

Title: Quantum Circuit Algorithms and Matrix Calculations in Higher-Dimensional Gravity

Table of Contents

- 1. Matrix Calculations in Structural Analysis**
 - Mathematical Rigor
- 2. Quantum Circuit Algorithms Applied to Closed-Gravity Structures in Black Holes**
- 3. Frolov's Theory and Compactified Dimensions of Black Holes**
 - Matrix Calculations for High-Dimensional Mathematical Models
- 4. Core Concept: Quantum Circuit Algorithms in a New N-Dimensional Gravity Framework**
 - Developing a New Gravitational Model Operating Across Multiple Dimensions
 - The Role of Quantum Circuit Algorithms in This Framework
- 5. Towards a New Mathematical Language**
 - Unifying the Concepts Explored in This Dissertation
